

Keyboards So Clean...

People Can't Wait to Get Their Hands on Them

Disinfectable, water-resistant, chemical-resistant PC products designed to enhance patient safety and infection control in medical environment

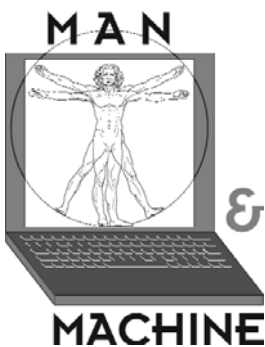

Yes, they're cool, but they're also tough enough to be cleaned with alcohol, 10% bleach solutions, and other chemical disinfectants. With a durable non-porous silicone rubber (100% Latex Free) construction, these "Cool" PC accessories are built to withstand rigorous disinfections that would render other keyboards and mice useless. Bacteria and viruses are minimized. Transfer of harmful microbes is minimized. Healthy environments stay healthy.

These "Cool" keyboards feature a superior ergonomic design with outstanding tactile feedback. Manufactured to the highest standards, these "good-to-the-touch" keyboards are easy to clean and use. With no cracks, crevices or seams on our keyboards, there is no place for microorganisms to hide and grow.

Our keyboards and mice are ideal for operating rooms, emergency rooms, nursing stations, medical carts, patient rooms, laboratories and anywhere infection control and cleanliness are of important. These "Cool" PC Products provide relief from the high cost of infections and cross-contamination. With our innovative line of infection-resistant PC accessories, infection control is finally at your fingertips.
