

CoolNPad Keypad

The CoolNPad is a water-resistant and contaminant proof keypad with tactile feedback keys. The sealed and flexible surface is ideal for industrial, marine, and medical use, as well as other applications where moisture, cleaning, and durability are a consideration. Because the CoolNPad is also quieter than "standard" keyboards, they are great for applications where noise generated from "key-clicks" is a problem. The CoolNPad is compatible with standard keyboard layouts and drivers are not needed.
