

# Customizable Keyboards & Peripherals

You name it.  
**We create it.**

**W**ith an in-house engineering staff that rises to any challenge, Man & Machine specializes in customized development and manufacture of unique keyboards and other peripherals for medical, educational, and industrial applications. From creating new custom peripherals such as a mag stripe card reader to sealing an existing product to satisfy infection control requirements, we have the expertise and innovation to meet your needs. In addition, we offer private labeling, a service that lets you brand our models as your own.

Already well known for customization in areas of endoscopy, radiology, and various industrial departments, you can rest assured your requests will result in the highest caliber of product attainable. One we stand behind with pride.

Contact Man & Machine at 301-341-4900 today to discuss your specific needs.
