

UCool Meditech

Economical Waterproof Disinfectable Keyboard for Meditech Applications.

Customized with a Meditech template, UCool offers protection from dirt, germs and spills specifically for hospitals and medical environments. Disguised as a regular keyboard, UCool Meditech looks and feels like a conventional model but goes underwater, wipes clean with disinfectants or alcohol and lives to see another day. Built-in drainage holes and sealed inner components make spills inconsequential. And a convenient locking device lets you wipe clean without unplugging. You get a rugged, cleanable workhorse, just for Meditech's MAGIC system.

For greater protection, consider adding a fitted drape. Made of 100% silicone, they can be chemically disinfected and also sterilized in an autoclave for the ultimate clean.

▲ Built-in Template for Meditech Applications

▲ U Cool M paired with a Man & Machine Mighty Mouse 5
