Really Cool Touch

Medical Grade™ Keyboard with Touchpad

TOUCHPAD OR MOUSE?

It's an important choice. Some users prefer to glide, others to click. Either way, the best pointing devices are seamlessly integrated with other keyboard features. Touchpad, footprint, ergonomics—even style—all must be in harmony for a user to be comfortable and productive.

Whatever its features, no keyboard should compromise patient health. Ordinary keyboards are vulnerable to blood, splatter and contaminants that no disinfectant can reach. You can't be confident that a keyboard is really germ-free unless that keyboard is Medical Grade™.

Medical Grade™ keyboards are sealed, seamless and silent. They clean up fast with 10% bleach solution or any EPA-certified disinfectant.

Our Medical Grade™ keyboards come in a variety of styles, sizes and capabilities. We can even custom-engineer one just for you. Profit by our experience. Profit by our industry.

Make sure your keyboard is Medical Grade™.

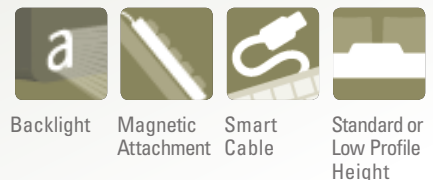

Features

-  **TRULOCK** Lock your keyboard for easy cleaning without disconnecting your computer
- Low Profile design
- Sealed, waterproof, immersible
- No moving parts, no mechanical failure
- Disinfect while on medical cart
